Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark DeLuca on 8/31/05.

The application has been amended as follows:

The Abstract (on a separate page) has been amended as follows:

Abstract

Methods of introducing genetic material into cells of an individual and compositions and kits for practicing the same are disclosed. The methods comprise the steps of contacting cells of an individual with a polynucleotide function enhancer and administering to the cells, a nucleic acid molecule that is free of retroviral particles. The nucleic acid molecule comprises a nucleotide sequence that encodes a protein that comprises at least one epitope that is identical or substantially similar to an epitope of a pathogen antigen or an antigen associated with a hyperproliferative or autoimmune disease, a protein otherwise missing from the individual due to a missing, non-functional, or partially functioning gene, or a protein that produces a therapeutic effect on an individual. Methods of prophylactically and therapeutically immunizing an individual against ~~HIV~~ pathogens are disclosed. Pharmaceutical compositions and kits for practicing methods of the present invention are disclosed.

It is noted that the inventive entities of the instant application and the US Patents 5,830,876, 5,593,972, 5,981,505 and 5,817,637 are identical. The examiner, in the previous Office Action erroneously indicated that the inventive entities were different and required applicants to resolve issues regarding 35 USC 102(e), (f) and (g). An examination of the Petition to correct inventorship filed under 37 CFR 1.48(b) in the instant application rendered the inventive entity of the instant case identical to the inventive entities of the US Patents. Therefore, the Terminal Disclaimers filed 6/1/05 (which are approved) are sufficient to overcome all Obviousness Type Double Patenting issues.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Guzo, PhD., whose telephone number is (571) 272-0767. The examiner can normally be reached on Monday-Thursday from 8:00 AM to 5:30 PM. The examiner can also be reached on alternate Fridays.
